

WTOP Weather and Traffic - Wait for it on the 8's - Not very instant. XM Radio gives the closest to instant Traffic and Weather - without the commercials. I pay for this service, and I do think it is well worth the monthley charge. To be able to get LOCAL weather and traffic when I am traveling out of town or traveling to my home town from out of town is a service not offered by the NAB stations.

NAB's petition 04-160 should not be considered.
